Side Effects of Beta Blockers on the Elderly

Multiple studies have now documented that blockers are additive to angiotensin-converting enzyme inhibitors in reducing mortality for congestive heart failure. Thus, elderly hypertensive patients...

Beta Blockers May Not Be Best Heart Drugs for Dementia ...

Beta blockers remain underused in elderly patients with heart failure. a contraindication to beta blockers. The SENIORS study confirmed that beta blockers are both efficacious and well tolerated in elderly people with heart failure, regardless of their ejection fraction. Because adverse effects may be

[Prescribing beta blockers in elderly patients with heart ...

There is increasing controversy regarding the long-term cognitive effects of beta-blockers on elderly people. Rogers and Bowman, 4 in a three-case report of older patients, demonstrated that subjects using beta-blockers (propranolol or atenolol) had insidious cognitive impairment. In each case, marked improvement occurred on drug withdrawal.

Beta blockers reduce heart rate and blood pressure, which is important for people with hypertension and other... Respiratory ...

Beta blockers - Mayo Clinic

Not only was beta-blocker monotherapy not effective, but patients who received the combination of beta-

blockers and diuretics fared consistently worse than those on diuretics alone. beta-blockers are less effective than diuretics in lowering blood pressure, and are poorly tolerated in the elderly. The reason for their inefficacy in the elderly may be related to their inherent unfavorable effect on systemic hemodynamics and pathophysiologic findings in the arterial tree, heart, kidneys, brain

Beta-Blockers: Side Effects, Drug Interactions, Safety

The development of new, selectively active beta-blockers has substantially reduced the number of possible side effects, thus enhancing therapeutic safety. Because side effects cannot be eliminated, however, beta blockers have been introduced only hesitantly into treatment of the elderly.

Beta-Blockers in the Elderly eBook by B. Ablad ...

Elderly patients are likely to have low renin levels; thus, neither blockers nor ACE inhibitors would be predicted to be effective. Yet this has not proved to be true in many studies. For example,...

Beta Blockers In The Elderly

"Routine use of beta blockers following [heart attack] may cause harm in high-risk populations -- such as the elderly with dementia and fragility -- and their use should be assessed on an individual level," Marzo

said.

Beta-Blocker Medications for Heart Disease Treatment

The analysis is based on 2 prospective studies of over 10,000 individuals over 55 years old A recent meta-analysis published in the British Journal of Clinical Pharmacology concluded that the use...

Beta-Blocker Use and Fall Risk Among Elderly: An Analysis ...

Compared to other drug classes (diuretics, calcium channel blockers, and renin angiotensin system inhibitors) beta blockers were not efficient in decreasing mortality and morbidity [17]. It is argued that the use of beta blockers in older adults may not be justified because of physiologic changes in people over 60 years of age.

Bing: Beta Blockers In The Elderly

Low-dose thiazide diuretics remain first-line therapy for older patients. Beta blockers, angiotensin-converting enzyme inhibitors, angiotensin-receptor blockers, and calcium channel blockers are...

B-Blockers in the Treatment of Hypertension in the Elderly

Two well-done reviews of beta-blocker trials show that

they are inferior for first-line hypertension treatment in the elderly who do not have heart failure or angina. FAST TRACK In older patients, beta-blockers were associated with a higher risk of adverse outcomes

Use of Beta-Blockers and Risk of Dementia in Elderly ...

Beta-blockers are one of the most widely prescribed classes of drugs to treat hypertension (high blood pressure) and are a mainstay treatment of congestive heart failure. Beta-blockers work by ...

Effectiveness and safety of beta blockers in the ...

The development of new, selectively active beta-blockers has substantially reduced the number of possible side effects, thus enhancing therapeutic safety. Because side effects cannot be eliminated, however, beta-blockers have been introduced only hesitantly into treatment of the elderly.

Beta Blockers in the Elderly | SpringerLink

Also, your doctor may prescribe a beta blocker as one of several medications to lower your blood pressure. Beta blockers may not work as effectively for black people and older people, especially when taken without other blood pressure medications.

Beta-Blockers in the Elderly: Lang, E., Sörgel, F., Blaha ...

Beta-blockers can trigger high blood sugar in people with diabetes. Depression, insomnia, and nightmares. These side effects are more common with older, nonselective beta-blockers.

When not to use beta-blockers in seniors with hypertension ...

Because diseases such as hypertension, angina, myocardial infarction, and arrhythmias are so prevalent among the elderly, beta blockers are commonly used in this population.

Why beta-blockers are not cardioprotective in elderly ...
