Labour economics is the study of the labour market. The labour market is the place where labours and employers meet and interact. This is the market where the labours sell their service to receive the payment which is called the wages. The labour provides his services to the employer, for which the employers pays wages to the labours.

Labor force participation is likely greatest for those retirees whose social security income is low (below \$12,000 per year). Thus, the change in benefits offers these retirees a pure (positive) income effect. These retirees should reduce their hours worked if not leave the labor force all together after the age of 65.
