Brucine - Wikipedia

Description Back to Top. Brucine Sulfate, Heptahydrate, Reagent, ACS is used in nitrate determinations. As a Reagent ACS grade quality reagent, its chemical specifications are the de facto standards for chemicals used in many high-purity applications and typically designate the highest quality chemical available for laboratory use.

than combined nitrate-nitrite, values are readily obtained by carrying out the procedure first with, and then without, the Cu-Cd reduction step. 2.2 Reduced volume versions of this method that use the same reagents and molar ratios are acceptable provided they meet the quality control and performance requirements stated in the method.

The Brucine method for nitrate is approved by the United States EPA as Method No. 352.1.1 When a water sample containing nitrate ion is treated with Brucine in sulfuric acid, a yellow solution results. The concentration of nitrate nitrogen may be calculated based upon the absorbance of the solution at 410 nm. Experimental Reagents and Apparatus

The 2008 CIR Expert Panel report also evaluated the scientific data for the denaturants Quassin, Brucine, and/or Brucine Sulfate and concluded that the data were not sufficient to support the safety of those denaturants. Several earlier CIR reviews also supported the safety of these and a few additional alcohol denaturants.

The method is based on the reaction of nitrate ion with brucine and 3-methyl-2-benzothiazolinone hydrazone hydrochloride (MBTH) in sulfuric acid medium to yield a violet-colored product which is stable for over two days. The optimum photometric range for the determination of nitrate is 0.04-0.16 microg cm⁻³ and the Sandell's sensitivity being 0.000279 microg cm⁻².

Deno and co-workers [8] showed that in 60% sulphuric acid the nitrate ion is completely converted to nitric acid. The oxidation does not take place directly, but probably through an ion such as NO⁺ [9]. Sandhu et al. [9] stated that brucine acts as a redox indicator in 2-3 M nitric acid, provided that urea is present.
