Use a maximum of four photos (.jpg, .png, .gif, or .bmp) per slide, and make sure they're larger than 200 x 200 pixels in size. No design ideas for process-based slides. Make sure your slide has the Title + Content slide layout applied. Don't use any additional photos, objects, or shapes on the same slide as your process text.

Writing Usable Documents | Technical Writing Tips and Tricks

A product may be both useful and usable and still fail to be used. The ultimate aim of a design is not to be useful or usable but for users to use that design. Without users a product is a failure and it doesn't matter how great the design was - it's still a failure. Two famous examples of this exist in the sphere of personal transport.

Designed for Use: Create Usable Interfaces for ...

Highly usable documents make information easily available, as they're straightforward, clear, and uncluttered. A successful document gives readers a sense of purpose and a clear path toward that purpose. When experts write with usability in mind, they save time and reduce effort for their audience. Analyze your audience

Designed For Use Create Usable

There is a large body of research discussing the many elements to creating usable forms. This article discusses a primary element of form design — the importance of aligning labels to fields. Should labels be placed above or adjacent to the input field, and if adjacent, should labels be right or left-aligned to the input field?

Designed for Use: Create Usable Interfaces for ...

Create consistency and use common UI elements. By using common elements in your UI, users feel more comfortable and are able to get things done more quickly. It is also important to create patterns in language, layout and design throughout the site to help facilitate efficiency.
