## **Periodontitis - Symptoms and causes - Mayo Clinic**

Gingivitis is the earliest stage of gum disease, an infection of the tissues around your teeth caused by plaque. If you have gingivitis, your gums may become red, swollen and bleed easily. You may also

experience bad breath. Because gum disease is usually painless, you may not know you have it.

## **10 Conditions That Can Affect Teeth and Gums**

Diabetes can cause periodontitis, the severe form of gum disease. Your gums may start to pull away from your teeth, which can make them loose or even fall out. If you have diabetes, you can lower your risk of developing periodontitis by keeping your blood sugar under control.

## **Symptoms of Tooth Infection Spreading to Body**

Studies suggest that oral bacteria and the inflammation associated with a severe form of gum disease (periodontitis) might play a role in some diseases. And certain diseases, such as diabetes and HIV/AIDS, can lower the body's resistance to infection, making oral health problems more severe. What conditions can be linked to oral health?

## **The 9 Most Common Dental Problems**

Gingivitis: Periodontitis is the most common cause of tooth loss. It occurs when chronic gingivitis (a result of bacterial plaque buildup) leads to loss of supporting bone around the tooth root. Symptoms include deepening of the gingival pockets between the teeth with the accumulation of calculus deposits.

## **Bing: Illnesses Of Teeth And Gums**

Symptoms of gum disease include: Bad breath that won't go away. Red or swollen gums. Tender or bleeding gums. Painful chewing. Loose teeth. Sensitive teeth. Receding gums or longer appearing teeth.

### **Diseases of the teeth and gums (ReelDx) | SMARTY PANCE**

Gum disease, also known as periodontal disease, is a bacterial infection involving the gums and sometimes the bone that surrounds a tooth. Gum diseases can affect one tooth or many teeth, and they range from gum irritation (gingivitis) to severe infection (periodontitis).

### **Oral health: A window to your overall health - Mayo Clinic**

Tooth - Tooth - Diseases of teeth and gums: Caries, or tooth decay, is the most common disease of the teeth among humans. Apart from the common cold, it is perhaps the most frequent disease in contemporary society. Tooth decay originates in the buildup of a yellowish film called plaque on teeth, which tends to harbour bacteria.

The report emphasized that gum disease alone is a risk for coronary artery disease, with some research finding a specific link regarding clogged arteries and gum disease. Every System in the Body is Connected - Trouble with Your Teeth Leads to Heart Complications. Experts still debate the extent of the link between heart health and oral health.

## **Gum Disease (Gingivitis & Periodontitis): Symptoms, Causes ...**

Gum disease, also known as periodontal disease, is an infection of the gums surrounding the teeth. It is also one of the main causes of tooth loss among adults. Some studies have indicated that there may be a link between heart disease and periodontal disease. 3 Everyone is at risk for gum disease, but it usually occurs after age 30.

## **Pictures of Common Dental Problems - American Dental ...**

Periodontitis (per-e-o-don-TIE-tis), also called gum disease, is a serious gum infection that damages the soft tissue and, without treatment, can destroy the bone that supports your teeth. Periodontitis can cause teeth to loosen or lead to tooth loss. Periodontitis is common but largely preventable. It's usually the result of poor oral hygiene.

## **CDC | Oral Health | Oral Health Conditions**
