Why is that? Well, low-volume production allows our customers to invest less time and money into tooling and materials, while also providing faster access to markets. Other advantages include more rapid response to shorter product life cycles, essentially acting as the critical step in between rapid prototyping and mass production.

The Plastic parts of materials like ABS, PP, PLA can be manufactured for low volumes of 20-200 parts without heavy investment on tooling. Additionally, transparent and Silicon parts of shore hardness 30-90 can also be done. Apart from these, for finishing of the product, we also do paint for the parts which can be achieved for any RGB colors.
