Veterinary Reconstructive Surgery For Pets: Dogs And Cats ...

In veterinary medicine, reconstructive procedures are in no way beautifying procedures. Instead, reconstructive surgery is used to correct painful, debilitating, and irritating conditions — to help with wound closures when not enough skin is available due to trauma, infection, or tumor removal — or to open up the nostrils in so-called “squishy-faced” breeds to allow for easier breathing.

Orthopedic Surgery | Southwest Veterinary Hospital

Board certified veterinary surgeons focus on techniques and technologies to manage complex surgical problems associated with soft tissue and orthopedic abnormalities. In addition to undergraduate training and four years of veterinary school, they complete an internship and residency in their specialized field, an additional three to five years ...

Animal Surgery | VCA Cheshire Animal Hospital

Reconstructive surgeries are often medically necessary when they are determined by the veterinarian to be the best option in restoring a pet's health and well-being. Comparatively, a cosmetic surgery is elective and entirely up to a pet owner. We do perform a complete physical before allowing your pet to undergo any surgical procedure.

Reconstructive Surgery and Wound Management of the Dog and ...

In veterinary medicine, reconstructive procedures are not beautifying procedures. Instead, reconstructive surgery is used to correct such painful and irritating conditions; to help with wound closures when not enough skin is available due to trauma, infection, or tumor removal; or to open up the nostrils in so-called squishy faced breeds to allow for easier breathing.

Fundamentals Of Surgical Oncology In Small Animals | Today ...

Veterinary surgeons can perform intricate surgeries in the chest or abdomen, such as repairing heart defects in dogs. Spinal injuries and herniated discs are problems that are also commonly referred to board certified surgeons. Veterinary surgery is also expanding into minimally invasive surgery, such as arthroscopy, thoracoscopy, and laparoscopy.
