Clinical Psychopharmacology is the branch of neuroscience that studies the use of medications to treat mental disorders. The American Psychological Association notes that Clinical Psychopharmacology involves the application of pharmacological principles, scientific data and clinical practices to individual psychopathology and problems across a range of populations. It blends the scientific ...

ASCP - American Society of Clinical Psychopharmacology ...

Clinical Psychopharmacology is expected to experience quality job growth over the next 5 years. From 2014 to 2024 the profession is projected to grow by 14% for those that use the specialized degree in an M.D. setting, and 19% for those that use it in a psychology setting. This positive outlook is due to the growing need for clinical pharmacologists to prescribe medication to treat mental ...
