5. Data Structures — Python 3.9.0 documentation

Download Free Structure And Function Of The Human Body For The Massage Therapist Anatomy Physiology Lecture Manual Sixth Edition 2011

The picture you have in your mind of the nervous system probably includes the brain, the nervous tissue contained within the cranium, and the spinal cord, the extension of nervous tissue within the vertebral column. That suggests it is made of two organs—and you may not even think of the spinal cord as an organ—but the nervous system is a very complex structure.

Structure & function — Science Leadership Academy @ Center

...

Curly braces or the `set()` function can be used to create sets. Note: to create an empty set you have to use `set()`, not `{}`; the latter creates an empty dictionary, a data structure that we discuss in the next section. Here is a brief demonstration:
