The Python Quick Syntax Reference | SpringerLink

Python Quick Reference Guide Conditional Statements and Loops Conditional Statements: if, elif and else Use if, elif and else to define code to be executed if a specified condition is true: `if patientid == 42113: print "The patient ID is 42113" elif patientid == 42007: print "The patient ID is 42007" else: print "The patient ID is some other number"`

The Python Quick Syntax Reference: Walters, Gregory ...

The Python Language Reference. ¶. This reference manual describes the syntax and "core semantics" of the language. It is terse, but attempts to be exact and complete. The semantics of non-essential built-in object types and of the built-in functions and modules are described in The Python Standard Library. For an informal introduction to the language, see The Python Tutorial.
