The Kidney Patient Guide is an experiment in online patient information - for kidney patients and those who care for them.

Chronic Kidney Disease Diet - What You Need to Know

Sodium is a mineral found in salt (sodium chloride), and it is widely used in food preparation. Salt is one of the most commonly used seasonings, and it takes time to get used to reducing the salt in your diet. However, reducing salt/sodium is an important tool in controlling your kidney disease. Do not use salt when cooking food.
